

When you're diagnosed, making the smartest choice starts with **A SECOND OPINION**

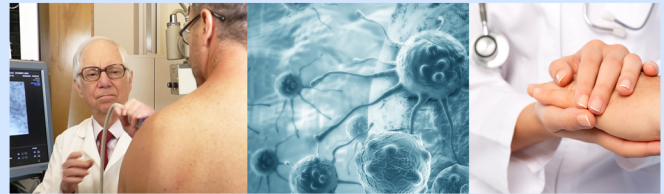

"-follow your instincts to get an alternate advanced & definitive exam for real PEACE OF MIND"

Knowing that you have CANCER can impair your ability to make the best choices. Regain your perspective with BARD CANCER DETECTION's SECOND OPINION PROGRAM. Our experts will thoroughly review your current health & lab reports and provide an alternate diagnostic imaging exam of your target area(s) to assess what's truly going on inside. Through our advanced 3D/4D Ultrasonic Imaging innovations, we can confirm your primary diagnosis or possibly uncover false-positives and other misreadings that could change your entire plan altogether!

Empower your treatment plans with a **CONFIDENT SECOND OPINION**

From the moment you receive the news about having cancer, you may grow curious about what other treatment options another oncologist would prescribe? You may want to get another doctor's perspective on your current diagnosis or get another set of professional eyes to review your reports. All these concerns are quite natural and common - especially when it comes to pursuing such a major commitment as cancer care. We all want to gather all the information we can from trusted sources to build an intelligent direction that gives us complete confidence. That's what a SECOND OPINION offers.

Bard Cancer Diagnostics is ready to provide a complete digital imaging exam using the most advanced and accurate ultrasonic 3D scanning and non-invasive screening technologies to evaluate your exact condition- in REAL TIME. Meet our medical director and world-recognized cancer imaging pioneer Dr. Robert Bard as he thoroughly analyzes your reports and conducts comprehensive readings of your target areas.

Our Second Opinion Program helps affirm (or challenges) your current treatment strategy for your exact type of cancer. Dr. Bard's unparalleled expertise in digital micro-imaging helps identify unique anomalies that other technologies may overlook. With Bard Cancer Diagnostics, you're investing in PEACE OF MIND and the power of smart and sensible care.
