## Early Detection & Prevention: A SMART INVESTMENT IN LONGEVITY

We are fortunate to be at the age in medicine and clinical technology where innovations in identifying disorders and the severity of any tumors are within our reach. Using state-of-the-art equipment, Dr. Robert Bard offers unique forms of sonography to evaluate blood flow related to tumor activity and to identify areas of suspicion. More tumor vessels signifies more aggressive disease. 3D analysis is non-invasive and rapid with results available to the patient during the visit. Patients in need of reassurance and world class imaging come from all countries for cancers of the prostate, breast, skin, thyroid and melanoma.

Bard Cancer Diagnostics specializes in PREVENTION solutions for our patients who strive to maintain a health-conscious lifestyle as well as those who are at increased risk of certain diseases (hereditary factors or environmental exposure to toxic substances) by confirming that their efforts to prevent disease are working.
